

Answers to clarification questions for: Community-based support – research and evidence review ITT

- 1. Could we have access to the outputs produced as part of the initial scoping of the Leeds Neighbourhood Network (LNN) evaluation?**

We have taken the decision not to publish these outputs and therefore will only be sharing them with the successful bidder once appointed. We anticipate that the information about the LNN contained within the ITT will be sufficient to produce a tender proposal. No other bidders will have seen these outputs.

- 2. On page 10 where the ITT provides details of the research to be carried out, second bullet point mentions 'Reviews of reviews, overview reports and grey literature (especially for objectives 3, 4 and 5)'. However, page 7-9 of the document only mentions 3 primary objectives. Where can we find details of Objectives 4 and 5?**

This is an error, with five total objectives existing only in an earlier draft of the ITT. We can confirm there are only three total objectives for consideration by bidders. The bullet referring to 'reviews of reviews, overview reports and grey literature' should therefore be considered as being especially relevant for objective three and to a lesser extent objective two.

- 3. On page 9 under Objective 3, part a) states 'see final paragraph, box 1 for a broad list of services offered'. Does this refer to the box on page 5 'About the LNN'?**

Yes.
